Significant Professional Accomplishments

EnZinc and carV3 Inc.

Founded a company to investigate electric vehicle technologies (lightweight structures, grid integration, batteries). Built development team and business case for a new type of zinc-air battery using technology developed by the US Naval Research Laboratory.

Computer Sciences Corporation

Helped create the Global Manufacturing Vertical, a new organization for CSC the Aerospace & Defense and Automotive markets.

Re-established a Defense presence for Computer Sciences Corporation (CSC) within the UK Ministry of Defense for logistics, command battlespace management, and intelligence. This business development resulted in a \$25m contract to provide an integrated IT architecture for NATO's Allied Rapid Reaction Corps HQ modernization plan.

Designed, implemented, and managed a Strategic Programme Office (SPO) to support CSC's largest client BAE SYSTEMS. The SPO delivered enterprise level programs to include the Global Infrastructure Programme (to install a common global e-mail and collaboration infrastructure), the e-business communication infrastructure, the e-trading business system, and the first phase of an e-enabled logistics support service. The SPO was responsible for about half the discretionary IT spend (\$43m). The four projects were delivered on time, \$300k under budget and provided CSC a 23% gross margin.

A lead executive in capturing \$1.2B contract with United Technologies Pratt & Whitney division, \$850M IT services contract with USAID, and renewing a multibillion-dollar contract with BAE Systems.

Led the CSC team that supported Lockheed Martin in the bid for the F-35 Joint Strike Fighter, specifically the Virtual Product Development Initiative - Lockheed's project to design and develop the aircraft in a 3-D virtual environment.

Nissan Motor Co Ltd

Led the team to design, build, test and deliver Nissan's high technology Group C racecar to compete at Le Mans. Five cars (two prototype and three production) were delivered on time and under budget. Lead engineer for eco-concept car for Tokyo Motor Show, Nissan Design International; lead engineer for NDI Maxima design.

General Dynamics Corporation

Led the team to build and deliver to Edwards Air Force Base the very first vehicle and subsequent versions of the USAF's first stealth cruise missile - AGM-129. Was the advanced designer for the missile and led a team to design and deliver an alternate classified version of the missile. Set up General Dynamics' largest cross-functional CAD/CAM facility to facilitate the design and provide information to manufacturing and vendors to meet very tight Air Force cost and schedule targets.

List briefly, previous experience serving in public office, and/or on civic commissions, boards, or committees:

Reasons for this appointment:

I believe that several library advisory board positions are up for expiration in June 2014 and I wish to be of service.

What are your qualifications for this appointment:

As an avid reader of professional and recreational books and as a mother of two school aged children aged eight and 12, I have come to rely on the library for books, ebooks, dvds, and library programs. Since 2008, my family has collectively checked out over 5,000 titles from Marin County libraries. I believe my patronage and personal demographic qualifies me as a public representative. Additionally, I look forward to the opportunity to "give back" to the library.

Briefly, what do you consider to be the most important, one or two current issues facing this Board/Commission/Committee?

Of utmost importance is ensuring the renewal of the Library Parcel Tax set to expire in 2015.

I understand that I, and all other applicants, will be personally interviewed by the Town Council as part of the selection process for this appointment. I also understand that my application material will be a public document and available on the Town's website. Sensitive materials that you don't wish to be posted on the website should not be included with the application.
